SaaS Executive Dashboard

Project summary | Power BI, DAX, data modeling

1.79M	619K	34.7%	88.8%	1,200
Total sales	Total profit	Profit margin	On-time delivery	Orders

Problem

Sales, cost, and delivery data for 1,200 orders sat in separate tables, so leadership could not quickly see revenue, profit, margin, and delivery performance in one place.

Approach

Modeled the data as a star schema (orders, customers, products, dates), wrote DAX measures for Total Sales, Total Profit, Profit Margin %, and On Time Delivery %, then designed a one-page dark executive dashboard with KPI cards, a monthly trend, region, category, and product views, and slicers for region, category, and delivery status.

Result

Total sales of 1.79M with 619K profit (34.7% margin) and 88.8% of orders delivered on time. Electronics drives 65% of sales, and the High-Perf Laptop alone brings in 37%.

Key insights

- Electronics earns 65% of sales (1.16M) and Furniture 35% (630K); Furniture has the higher margin at 36% versus 34%.
- The High-Perf Laptop is the top product with 653K, about 37% of all sales; the Standing Desk follows with 300K.
- North America leads regions with 496K (28%); Asia Pacific is the smallest with 380K (21%).
- Of 1,200 orders, 1,066 were delivered, 110 delayed, and 24 returned.
- Monthly sales peaked at 149K in January 2025 and ranged between about 71K and 149K over the 18 months (Jan 2025 to Jun 2026).

Tools

Power BI Desktop, DAX, star-schema data modeling
